- BTECH Graduate

2018

### HARIYANA VIDYA MANDIR

Kolkata, WB

#### Certificate of Higher Education: PURE SCIENCE

GPA: 7.96

05/2016

### ST. JOAN'S SCHOOL

#### MATRICULATION

GPA: 92.4

## PROFESSIONAL AFFILIATIONS

STACKROUTE NIIT

[FULL STACK SOFTWARE DEVELOPMENT]

## PROJECTS

### Muzix Application:

Developed a dynamic movie website that includes the latest releases, payment integration, and user registration. I utilized APIs and web scraping to retrieve movie data, and implemented user-focused features such as subscription plans, multiple user accounts, trailer playback, and search functionality.

**Spotify Application:** Created a spotify website utilizing Angular for the frontend and Restful APIs for the backend. The application features add-to-favourite, delete from favourite, and user authentication functionality, including login, logout, and signup forms. Implemented routing and guarding for secure access.

**Jukebox Application:** Developed a Jukebox project using Java language. The project enables users to perform various functions such as creating custom playlists, adding songs to those playlists, and searching for songs based on their genre, artist, and name. The application also includes a user authentication feature that requires users to log in before accessing certain parts of the application. Lastly, users can play songs from their created playlists.
